

EudaLearn

Builder-skills practice on Ludwitt · @joes9987 · Hult Summer Pilot 2026

One-liner: Short modules that train how builders brief, launch, and ship with AI — with Ludwitt login and credit-backed coach tips.

PROBLEM

- AI tools are everywhere; deliberate practice is not.
- Long courses are too slow; chat tips are unmeasured.

SOLUTION

- 7–10 min modules + quiz + optional coach tip.
- Approved Ludwitt marketplace app; counted sessions.

MODEL

- Free core practice; tips spend Ludwitt credits.
- 70% BYOB engineer share; B2B cohort packs next.

TRACTION

- Full Euda suite shipped (Market / PM / Chat / Learn).
- Creator listing approved; OAuth live.
- Metrics via app-owned Ludwitt-shaped API.

ASK

Pre-seed conversation for distribution + B2B packaging. Live product — not a deckware rebuild.
