

HULT SUMMER PILOT 2026 · PRE-SEED CONVERSATION

EudaLearn

Short practice modules that sharpen how builders brief, launch, and ship with AI — on Ludwitt credits.

@joes9987 · [learn-joes9987.vercel.app](#) · [ludwitt.com/dashboard/marketplace/eudalearn](#)

PROBLEM

Builders use AI daily. They rarely practice the skills that make it reliable.

- Long courses are too slow for people already shipping.
- Twitter tips and Notion docs are unmeasured.
- Cohorts need attributed practice sessions — not pageviews.

SOLUTION

8-minute modules. Ludwitt login. Counted sessions.

Learn — briefs, launch trust, telemetry, suite thinking.

Identity — approved Ludwitt OAuth + marketplace listing.

Coach — optional AI tips billed via Ludwitt credits (70% BYOB share).

Proof — instrumented events for external-user metrics.

WHY NOW

AI coding is mainstream. Practice infrastructure is not.

- Credit wallets (Ludwitt) make micropayments for tips viable.
- Cohorts and bootcamps need audited “qualified practice” counts.
- Suite distribution (Market / PM / Chat) is already live beside Learn.

PRODUCT

Live today

- App: learn-joes9987.vercel.app
- Listing: marketplace/eudalearn
- Suite: [EudaMarket /suite](https://EudaMarket/suite)
- Privacy, dark/light theme, mobile-usable practice loop

TRACTION

Shipped the suite. Opening distribution.

- Phase 1: EudaPM, EudaChat, EudaMarket in production.
- Phase 2: EudaLearn on Ludwitt Creator — app **approved**.
- Gate this week: ≥ 25 qualified external practicers (own metrics API + Ludwitt identity).
- Events tagged campaign=p2-venture for an honest snapshot.

MARKET

Start narrow. Expand to cohort B2B.

Layer	Focus
TAM	Developer upskilling + AI education spend
SAM	Builders who want short, measured practice
SOM	Ludwitt marketplace + pilot cohorts (Y1)

Details in market-research.md

MODEL

BYOB credits now. Seats next.

- Free core modules → maximize qualified sessions.
- Coach tips spend Ludwitt paid credits → **70%** to EudaLearn.
- Y1–Y2: cohort packs (private modules + completion CSV).

COMPETITION

Not another 20-hour course.

- Coursera/Udemy — too long, not Ludwitt-native.
- Prompt marketplaces — sell assets, not practice.
- ChatGPT — unstructured, no audited sessions.
- **Us:** short loop + identity + credits + suite GTM.

GTM

Marketplace + suite + founder-led distribution

- Ludwitt listing as canonical entry.
- EudaMarket suite CTAs.
- LinkedIn / community asks outside the cohort.
- Then: sell packs to operators who need attributed practice.

TEAM

Builder who already shipped the suite

@joes9987 — EudaPM, EudaChat, EudaMarket, EudaLearn in one pilot. Next: content velocity + B2B packaging.

ASK

Pre-seed conversation

- Looking for angels / micro-funds who understand marketplace + edtech wedges.
- Use of funds: module velocity, B2B pilot design, distribution — not a rewrite.
- Next step: 20 minutes or written deck feedback.
