

THE EFFECTIVE FACILITATOR

AI makes creation abundant.
Human judgment sets the limit.

An assessment-led learning platform for judgment, self-awareness and human agency in AI-mediated work.

PRE-SEED

US\$300K

15–18 months to a validated,
repeatable assessment-and-
learning business

Live MVP • Initial practitioner validation
• Nine-discipline framework

AI accelerates production—not human judgment

Organisations can generate more content, analysis and options than ever before.

But the difficult questions remain human:

- What deserves trust?
- Who retains responsibility?
- When should we direct, question, revise or release?

THE CAPABILITY GAP

More output ≠ better judgment

Most AI training teaches tools and prompts.
Most assessments describe personality.
Neither directly develops how people respond
when influence, uncertainty, responsibility and
control collide.

AI adoption is outpacing human–AI capability

39%

of core job skills are expected to change by 2030

WEF, 2025

63%

of employers cite skills gaps as a key barrier to transformation

WEF, 2025

51%

of managers expect AI training or upskilling to become a key team responsibility

Microsoft, 2025

As AI takes on more execution, organisations need people who can preserve agency, exercise judgment and adapt under ambiguity.

TEF turns reflection into a development pathway

A learner does more than consume content.

The result: personalised insight that leads directly to practice—not a static personality label.

Nine disciplines form one expandable capability system

REGARDING OTHERS

Detachment

Focus

Engagement

REGARDING MYSELF

Interior Dialogue

Intentionality

Sense of Wonder

REGARDING LIFE

Awareness

Action

Presence

MVP live now

Detachment • Intentionality • Sense of Wonder

Funding completes the full nine-discipline experience.

The assessment engine creates an actionable profile

Behavioural self-assessment

Situational judgment

Confidence ratings

AI-use reflection

PERSONALISED PROFILE

- 01 **Nine-discipline capability map**
- 02 Authority, ambiguity + control orientations
- 03 Strengths + development priorities
- 04 Possible overuse tendencies
- 05 Recommended starting modules

Confidence remains visible beside capability—revealing where certainty and demonstrated judgment diverge.

A practitioner wedge opens the workplace market

1	Individuals	Self-directed facilitators, team leaders and managers	Entry + learning data
2	Consultants	Facilitators, coaches, OD and change practitioners	Distribution + client use
3	Organisations	HR/L&D, leadership and transformation teams	Cohorts + repeat deployment

Beachhead

Practitioners already helping people navigate AI-enabled work

Expansion

Enterprise L&D

TEF bridges assessment, learning and AI readiness

Category	Self-report	Applied judgment	Development path	AI-use reflection	Client deployment
Personality tools	●	—	—	—	●
Leadership courses	●	●	●	—	●
AI-readiness training	—	●	●	●	●
The Effective Facilitator	●	●	●	●	●

Defensible value grows through scoring logic, longitudinal profiles, practitioner workflows and organisational benchmarks.

Three tiers move users toward higher-value deployment

INDIVIDUAL

US\$49–79

Assessment, personal profile
and learning access

Low-friction acquisition

CONSULTANT

US\$149–299

Professional licence, client
application and materials

Practitioner-led distribution

ORGANISATION

US\$2.5K–15K+

Cohort deployment, admin
support and reporting

Repeatable B2B revenue

Expansion levers: additional modules • reassessment • premium reports • facilitator certification • organisational benchmarks

Founder-led validation becomes practitioner distribution

01 PROVE

Direct outreach + pilot cohorts

Confirm resonance, completion and willingness to pay

02 EQUIP

Consultant licences + client materials

Turn practitioners into a trusted distribution channel

03 EXPAND

Organisational pilots + partnerships

Convert evidence into repeatable cohort deployments

Channels

LinkedIn thought leadership • workshops • training partners • consultant referrals • targeted HR/L&D pilots

Early practitioners recognise the need

complete modules

1

working baseline assessment

2

early practitioner signals

“My profile scores definitely captured how I feel about using AI to support clearly defined organisational objectives.”

Curt P. Wellington
Faculty / Consultant, Arthur Lok Jack Graduate School of Business
Usefulness: 4/5 • Would continue using it

“Yes. I sent it around, asking others to complete it as well.”

Gwendolyn McLaren
HR Consultant, GCO Consulting

Built from facilitation practice—not an AI trend

**LORRAINE
VILLAROEL**

Founder

Community development •
facilitation • learning design
• AI engineering

Founder–market fit

- 25+ years leading and supporting community and nonprofit initiatives
- Experienced facilitator and trainer across service, leadership and organisational development
- Currently building at the intersection of people, AI, creativity and social transformation

The framework originated in lived facilitation practice and is now being translated into a scalable digital product for AI-era work.

US\$300K turns the MVP into a validated company

Runway 15–18 months

Instrument Pre-seed SAFE /
equivalent

Primary goal Validate repeatable
demand

Strengthen human judgment as an essential, measurable capability for the AI era.

- 01 9 modules + validated scoring engine
- 02 6–10 paid organisational pilots
- 03 50–75 consultant licences
- 04 2,000+ learner profiles
- 05 **Validate a pathway to US\$100K+ in annual recurring revenue**

INVESTMENT THESIS

AI can generate possibilities.

TEF helps people remain purposeful, accountable, creative and fully human while deciding what those possibilities should become.

The Effective Facilitator develops the capacities AI cannot replace.
